EDUCATION

University of California, Irvine | GPA: 3.98/4.0 **Expected graduation – June 2027**
B.S. Computer Science & B.S. Business Information Management (AI Specialization)
Leadership: Founder & President - AI in Healthcare (CareTech), Vice President - Women in Cybersecurity
Involvement: Women in CS, Hiking@UCI, Cyber@UCI; Tech Team at Blockchain UCI

EXPERIENCE

ICS Tutor **Sept. 2025 – Present**
University of California, Irvine *Irvine, CA*

- Guided 100+ students in lower-division classes across discrete math, C++, Python, and Java.
- Taught systematic debugging, algorithm design, and writing maintainable, production quality code.

SecOps Intern **July 2025 – Sept. 2025**
Simpl (FinTech Company) *Bangalore, India*

- Conducted security analysis on Simpl's payment integration across a 26k+ vendor network, identifying 4 exploitable bugs in live systems and improving payment system reliability.
- Validated CVEs in internal code using Docker, assessing data risks for 1M+ monthly active users.

Artificial Intelligence Research Assistant **Jan. 2025 – Present**
University of California, Irvine *Irvine, CA*

- LLMs in Education (Prof. Hadar Ziv): Co-authored an IEEE-published paper analyzing student attitudes toward generative AI in computer science curricula.
- Wildlife Monitoring (Prof. Nadia): Built deep learning models on NASA PACE datasets to classify plankton behavior, increasing accuracy 32% through data preprocessing and feature engineering.

Software Developer Intern **June 2024 – Sept. 2024**
Mendix (Low Code Platform) *Irvine, CA*

- Gathered and translated business requirements into scalable application features, delivering 5+ production-ready solutions using Agile methodologies.
- Worked across frontend customization, application logic, debugging, and deployment processes.
- Collaborated with UX team to design data-driven features, improving user engagement by 8.2%.

PROJECTS

DataMint AI Marketplace | *React, TypeScript, Node.js, Tailwind CSS, APIs* **April 2026 – May 2026**

- Developed an award-winning full-stack AI and blockchain powered marketplace platform featuring responsive UI, wallet integration, and blockchain-based ownership verification.
- Built backend APIs and decentralized storage workflows for secure metadata and transactions.

Text-2SQL | *Python, Git, Github, Google Gemma-2B-it AI, Mistral-7B AI* **Feb. 2025 – April 2025**

- Designed and optimized an AI-driven system to translate natural language into SQL queries.
- Fine-tuned Gemma to improve SQL generation accuracy by 50% over Mistral-7B on 10k+ queries.
- Ran systematic ablation studies and EM/EX evaluations to optimize model performance.

Web Crawler & Search Engine | *Python, Git* **Feb. 2026 – March 2026**

- Built a scalable search engine indexing 50k+ pages using concurrent processing.
- Designed efficient indexing and query-processing systems achieving sub-300ms query latency.
- Implemented backend for URL scheduling, ranking, and retrieval under heavy workloads.

TECHNICAL SKILLS

Frontend | React, Tailwind CSS, JavaScript, TypeScript, HTML, CSS
Backend | Node.js, Python, Java, C/C++, REST APIs, GraphQL, SQL
DevOps & Cloud | Linux, Docker, Kubernetes, CI/CD, AWS, Microsoft Azure
Databases & Practices | PostgreSQL, MySQL, SQLite, OOP, SDLC, Agile, Debugging, Documentation
